MSGPACK_V1_TYPE_WINT_DECL_HPP Hi Michael, You might be thinking of the very weird but "special" keyboard layout for phonetic input. I got a look at what you posted, and that is a quasi JIS layout based on half of the alphabet, and with Q, and a zot on the other half. I looked at that layout, and never noticed it before. It even has F, ff, Fs, FS. Since it's a unique layout, it should be easy to duplicate for ru.su. It is interesting in an historical sense. Another possibility of course is vertical QWERTY. It would be much less interesting from my point of view.

Story highlights

Quinton Lucas was charged with shooting his girlfriend "I do not have an explanation for this," Lucas's stepfather says (CNN) A teenager was held at gunpoint and threatened to be shot after shooting a 12-year-old girl in the leg in Indiana, police said.
