This release is for the PS4 version only, and is part of the "PS4 Patch - Case Closed" update. A few more changes have been made to the PC version, but there's nothing new you should worry about. The patch is a little big (it's around 20MB), and it's highly recommended that you unzip it first. As the patch is compressed, you won't see anything happen until you do. There are two patches (one for Steam and one for DirectPlay), both should be unzipped and put into the same folder. The following is the patch for Steam, be sure to unzip it first: "C:\Games\Arkham City (Steam)\Arkham City.exe - Steam" If you want to do it yourself, the patch also includes the launcher, so you don't need the "SteamCMD.cmd" file that has been removed. This patch only 82157476af
